**ANNUAL REPORT OF THE SUPERINTENDENT  
OF SCHOOLS.**

To the Board of School Directors  
and Citizens of Strafford:

As required by law, I herewith submit the annual report of the Superintendent of Schools for the school year ending June 30, 1933.

During the year which this report covers, seven elementary schools have been maintained for a period of 34 weeks each. One hundred pupils have been enrolled, fifty-five boys and forty-five girls. One child was under six years of age; eighteen were between six and

eight years of age; seventy-seven were between eight and sixteen; and four were over 16 years of age. The school attendance was 91.41 per cent of what it would have been had there been no absences.

Certificates for the satisfactory completion of the elementary school course which entitles pupils to free advanced instruction were issued to the following persons: Lillian Kendall, Katherine Ward, Evarts Sweet, Vernon Clogston, Catherine Doyle, James Simcox, Carl Perkins, Denise Doyle, Mary Simcox.

Tuitions for high school attendance were paid by the town for ten resident pupils at an average cost of \$75. The average cost per pupil for elementary schools without deductions for state aid, was \$67.90.

In December, 1933, standard tests for silent reading ability were given to the forty-three pupils in grades 4 to 8. A comparison of results with standards obtained from pupils of average mental ability in average classes in the schools in New York City, showed that, on the average, pupils of these grades in Strafford are above the school grade of city children in this ability by about one-fourth of a school grade. Eighteen pupils were above their school grade for silent reading by an average amount of two whole grades. Without deductions for possible cases of less than average mental ability, twenty-five pupils were below grade in silent reading by an average amount of .93 of a school grade. With these facts in mind, I feel that steps not as yet attempted should be taken to bring those who are below grade in this respect at least up to the school grade in which they are rated. As a means to this end, I recommend that the state requirement for maintaining the rating of standard and superior schools by adding five new books each year to the school library be met in full, that each school library be brought up-to-date by adding the required number of new books for each of the preceding years that this requirement was overlooked, and that a maximum amount of not more than five dollars be paid to each teacher to pay for transportation of books to and from the State Library at Montpelier.

Respectfully submitted,

A. COURTNEY PARKER,  
Superintendent of Schools.
